

★Flood Control Month of May★

The standard for evacuation recommendation is decided by the water level of the rivers flowing in Ashikaga City, Watarase River, Kiryu River, Yabagawa River, Hatagawa River and Fukuro River.

When heavy rain falls, evacuation information from the City is issued according to this determined water level.

From the month of May, when possibility of flooding (overflowing from river) becomes high in Watarase River, Kiryu River, Tonegawa River, urgent emergency emails will be sent to mobile phones and smart phones.

◆ For more information: contact the Crisis Control Section (☎0284-20-2247).
